Career Objective

As a dedicated Information Systems student at Binus University with a solid foundation in web development, I am seeking opportunities to apply my skills in Laravel, PHP, HTML, CSS, and MySQL, gained through freelance projects. Eager to contribute to a dynamic team, I am driven to further expand my expertise in finance, data science, artificial intelligence, and machine learning. My goal is to leverage my technical abilities, problem-solving skills, and passion for continuous learning to build a versatile and impactful career in the tech industry.

Education

Bachelor of Information Systems 2022 – 2026

- **BINUS University** - Kemanggisan, Jakarta
- **Coursework:** Enterprise System, Information Systems Project Management, Information Systems Analysis and Design, Information System Security, Analytical Information System, IS Strategy Management and Acquisition

Skills

Web Developer 2019 – Present

- Developed engaging and responsive websites using **HTML & CSS** through comprehensive autodidactic learning and hands-on workshops.
- Built custom web interfaces to ensure cross-browser compatibility and seamless user experience.

Backend Developer (PHP & MySQL) 2021 – Present

- Built dynamic web applications using **PHP 7** and **MySQL**, utilizing Codepolitan courses and self-taught resources to master database management and backend functionality.
- Implemented secure data handling, optimized queries, and created robust, scalable databases for client projects.

Java 2022 – Present

- Learned object-oriented programming principles in **Java** through coursework at BINUS University, building foundational applications and gaining proficiency in algorithms, data structures, and debugging techniques.
